Ordering Materials With a CF Center Account	6-10
How to Register an HCP Account	11
Ordering Materials With an HCP Account	12-16

INDICATION AND IMPORTANT SAFETY INFORMATION

INDICATION

Pulmozyme® (dornase alfa) is indicated for daily administration in conjunction with standard therapies for the management of cystic fibrosis (CF) patients to improve pulmonary function.

In CF patients with an FVC \geq 40% of predicted, daily administration of Pulmozyme has also been shown to reduce the risk of respiratory tract infections requiring parenteral antibiotics.

IMPORTANT SAFETY INFORMATION

Pulmozyme is contraindicated in patients with known hypersensitivity to dornase alfa, Chinese Hamster Ovary cell products, or any component of the product.

The most common adverse reactions associated with the use of Pulmozyme include: voice alteration, pharyngitis, rash, laryngitis, chest pain, conjunctivitis, rhinitis, decrease in FVC of \geq 10%, fever, dyspepsia, and dyspnea. There have been no reports of anaphylaxis attributed to the administration of Pulmozyme. Mild to moderate urticaria and mild skin rash have been observed and have been transient.

PEDIATRIC USE

The safety and effectiveness of Pulmozyme have been established in pediatric patients 5 years of age and older. The safety of Pulmozyme, 2.5 mg by inhalation, was studied with 2 weeks of daily administration in 65 patients with cystic fibrosis aged 3 months to < 5 years. While clinical trial data are limited in pediatric patients younger than 5 years of age, the use of Pulmozyme should be considered for pediatric CF patients who may experience potential benefit in pulmonary function or who may be at risk of respiratory tract infection.

The safety of Pulmozyme, 2.5 mg by inhalation, was studied with 2 weeks of daily administration in 98 pediatric patients with cystic fibrosis 3 months to 10 years of age (65 aged 3 months to < 5 years, 33 aged 5 to \leq 10 years). The PARI BABY™ reusable nebulizer (which uses a facemask instead of a mouthpiece) was utilized in patients unable to demonstrate the ability to inhale or exhale orally throughout the entire treatment period (54/65, 83% of the younger; and 2/33, 6% of the older patients). Overall, the nature of adverse reactions was similar to that seen in the placebo-controlled trials in older patients. The number of patients reporting cough was higher in the younger age group as compared to the older age group (29/65, 45%; compared to 10/33, 30%) as was the number reporting moderate to severe cough (24/65, 37%; compared to 6/33, 18%). The number of patients reporting rhinitis was higher in the younger age group as compared to the older age group (23/65, 35%; compared to 9/33, 27%) as was the number reporting rash (4/65, 6% as compared to 0/33, 0%).

You may report side effects to the FDA at **1-800-FDA-1088** or www.fda.gov/medwatch. You may also report side effects to Genentech at 1-888-835-2555.

Please see the Pulmozyme full **Prescribing Information** for additional Important Safety Information. For other information, please see Pulmozyme **Instructions for Use**.

INDICATION AND IMPORTANT SAFETY INFORMATION

INDICATION
Pulmozyme® (dornase alfa) is indicated for daily administration in conjunction with standard therapies for the management of cystic fibrosis

Click the “Login/Sign Up” link to login to the site or register. Click the cart icon to view items in your cart. Click the book icon to launch a digital version of this guide.

Click the “Click here” link to go to page where you can login with your CF Center ID and password. You can also register your center.

Enter the quantity of the item you would like to order and click the “ADD TO CART” button.
Note: Cannot order more than the “up to” value.

Click the magnifying glass icon to launch the “Item Spotlight” page. Here you can view more images and detail about an item.

Click the “DOWNLOAD” button in order to view the digital version of this piece. If user is not logged in, they will have to provide identifying information in order to access.

QUESTIONS? Contact us at
genentechmaterials@mysgi.com
or 877-946-5348

The screenshot shows the Genentech website interface. At the top, the Genentech logo and 'A Member of the Roche Group' are on the left, and 'Login/Sign Up | (0) |' is on the right. The main content area has a login section with fields for 'User Name/ Center ID:' and 'Password:', a 'Click here' link to reset the password, and another 'Click here' link to recover the Center ID. Below these is a 'LOGIN' button. A section titled 'Don't have an account?' includes a note about requesting devices and two buttons: 'CREATE A CF CENTER ACCOUNT (Support materials and devices)' and 'CREATE HCP ACCOUNT (Support materials only; no devices)'. At the bottom, there is a section for 'INDICATION AND IMPORTANT SAFETY INFORMATION' with an 'INDICATION' subsection. Red callout boxes with arrows point to specific elements: one to the login fields, one to the password reset link, one to the Center ID recovery link, one to the CF Center Account button, and one to the HCP Account button.

Enter your User Name or Center ID, along with password to login to the site.

Click the "Click here" in order to reset your password. The user will enter their Center ID and receive an email with temporary password.

Click the "Click here" to recover your CF Center ID. Fill out the short form to have your center information validated.

Click the "CREATE A CF CENTER ACCOUNT" button to register your CF center. Note: To order masks you must login with a registered CF Center account.

Click the "CREATE HCP ACCOUNT" button to create a standard HCP account to order materials.
